

Website Proposal · July 2026

PREPARED FOR SPRINGREENS · COMMUNITY CAFÉ

A site as good as the *plate.*

Your food and your mission deserve better than a rented template. I rebuilt Springgreens' website three different ways — pick the one you love, and I'll make it yours. You own it, and your online ordering keeps working.

PREPARED BY

FOR

Springgreens
East Atlanta, GA

Three directions. *You choose.*

Same real content — your menu, your photos, your logo — three different feels. Open each on your phone and tap the 1 · 2 · 3 switcher at the bottom of any page to flip between them.

Soul Kitchen

WARM & COZY

[springgreens-website](#)

Homestyle and inviting. Deep green, honey and cream with a soft serif — the crave-first, family-table feel. The dependable crowd-pleaser.

Fresh Market

BRIGHT & MODERN

[springgreens-website/v2](#)

Clean and current. Airy, editorial layout with a bold modern typeface and a citrus pop — leans into the "healthy" side and looks right at home on Instagram.

Heritage

PREMIUM & CINEMATIC

[springgreens-website/v3](#)

Elevated and soulful. Dramatic full-screen photography, an elegant serif and gold accents — the fine-dining feel that helps justify catering and event pricing.

Whichever you pick, it uses your real logo, your real menu & prices and your own photos, works in light & dark, is built for phones, and keeps your online ordering exactly where it is. See all three live: **[inheriting-islam.github.io/springgreens-website](#)**

Everything, *done for you.*

A complete, launch-ready site in the design you choose — not a template you wrestle with afterward. Every piece below is included in one price.

1

Your chosen design, built out

Every page in the direction you pick — real content, on-brand, mobile-perfect, light & dark mode. Includes your feedback round.

2

Off Popmenu — you own it

Migrated to your own site with your online ordering never interrupted. No more monthly rent for a site you'll never own.

3

A crave-first menu

Your real items & prices, beautifully organized — with a one-tap filter for halal, vegan-friendly and seafood.

4

Catering that actually sells

A real catering page with an inquiry form (date, headcount, details) so your biggest tickets stop hiding in a menu.

5

Ramadan & seasonal page

A ready-made home for iftar meals, masjid & Eid catering and pre-orders — set up for your busiest season.

6

Found on Google

Built to rank for "halal food Atlanta," "halal catering Atlanta" and "halal soul food" so new customers find you.

7

Your real brand

Your recovered logo, your story, and social proof — told with soul. Plus a newsletter signup to grow your list.

8

Launched & trained

Handed to you working, with a short walkthrough so your team can update the menu anytime.

Already de-risked: the whole thing is already built and clickable — three ways, on desktop and mobile. This is about picking one, making it yours, and owning it — not starting from a blank page.

A brother's rate.

A custom restaurant site like this normally runs **\$2,500–\$3,500**. For you, akhi — priced as a gift, because I want your good work seen.

ONE-TIME · BUILD

Built & launched

\$1,250 ~~\$2,800~~

Pick your design, and I build it out fully — migration off Popmenu (your ordering kept), your real menu & photos, catering lead form, SEO, launch and a team walkthrough.

50% deposit to begin; the rest at launch.

BROTHER'S RATE

MONTHLY · CARE PLAN

Kept fresh & healthy

\$75–100/mo

- ✓ Hosting, SSL, backups & monitoring
- ✓ Menu & price updates included
- ✓ Seasonal campaigns — Ramadan, Eid, specials
- ✓ Security & small tweaks
- ✓ A real person who knows your site

THE CLOSER

Likely less than Popmenu — and you own everything. Popmenu runs roughly **\$150–\$400/mo** for a site you'll never own. Your care plan is less than that, and this time the site is yours.

All I ask in return: a short testimonial, and — if you love it — an intro to a couple of other Muslim businesses or masajid who might need the same. That's how this whole thing grows, in shā' Allāh.

Fast, and *in your hands*.

We move quickly, but nothing touches your current site until you say go — the new one lives on a private preview link the whole time.

This week

Pick your design

Click through all three on your phone, tell me which feels most like Springreens, and share any first reactions.

Week 1

Make it yours

50% deposit to begin. I apply your tweaks, lock the menu, prices and photos, and finish the build in your chosen design.

Week 1-2

Launch

Point your domain at the new site with redirects in place — zero downtime. Your online ordering verified before and after.

Ongoing

Care

I keep it fast, secure and updated — menu changes, specials, and Ramadan campaigns — so it keeps working for you.

WHAT I NEED FROM YOU (MOSTLY JUST CONFIRMING)

- Which of the three designs you love
- Confirm the menu + any missing prices
- Your online-ordering login
- Your logo files (I already recovered a copy)
- A few better dish photos, if you have them
- Any brand likes / dislikes

A note on trust. Your live site and your orders stay exactly where they are until launch day. The new site runs on a private preview link through the entire build, and the switch is reversible.

NEXT STEPS

Ready when *you are*.

Three small things get us moving — none urgent, and none affect your current site until launch day.

- 1 Pick your favorite.**
Click through the three designs and tell me which one feels most like Springreens.
- 2 Green-light the build.**
Build + Care Plan. I send a simple one-page agreement and take the 50% deposit to begin.
- 3 Share your assets.**
Logo files, confirmed menu & prices, and your ordering login so I can match everything and wire up the launch.

PREVIEW ALL THREE

See them live on any phone or computer:
inheriting-islam.github.io/springreens-website
Tap the 1 · 2 · 3 switcher to compare.

LET'S TALK

Questions, tweaks, or a different scope in mind? Let's grab coffee.

Build — your chosen design (one time)	\$1,250
Care Plan (monthly)	\$75–100/mo
Online ordering	Keeps working · \$0 change
You own the site	Yes

BISMILLAH — LET'S GIVE YOUR FOOD THE HOME IT DESERVES

Soul food, reimagined.

Your food already brings people back every week. Let's give it a site that does the same — one you own, that grows with you.
